

Controlling and Overcoming Brain Aging!

„Ana Aslan” Academy of Aging has the honour to introduce you probably the most interesting New Millennium International Journal, „Brain Aging”.

Ana Aslan was the first one, all over the world, who defined, in 1953, Geriatrics, Gerontology as the most futuristic form of millennium clinical specialization.

This great lady, who had the vision in the early 50-ties to define „Gerontoprofilaxy” as the advanced weapon to fight against aging, said that *human life is artificially shorted, but anyone can discover the secrets of longevity!*

We are pleased to publish under the auspices of „Ana Aslan” Academy of Aging, the latest news from all over the world, in this so incandescent scientific field, like brain aging is.

This is a journal which attempts to explain in a clear and scientific language, how this knowledge may one day possibly be used to control and overcome brain aging!

We have the mission to encourage also young researchers in publishing, in this field of activity, to grant the most talented of them, every year!

Hopefully, **Brain Aging** will be the host of publishing revolutionary papers, warm scientific information, and Brain aging scientific timetable.

Read a new Journal, **have a new friend!!!**
